Museum Of Olympic Art

Story...

The beauty of the gesture is the key word of this series of images...

Each sport is thus declined by its most symbolic gesture to express the harmony between the body and the sport. I chose to express the simplest emotion of the sporting gesture by a skeleton, symbol of human homogeneity.

Project...

I would like to be able to give the emotion of the beauty of each Olympic sport through a photo exhibition or other display...

This project is the work of several years of work, research and days of 3D computer calculations, is still in progress, to achieve all the Olympic sports of Paris 2024.

Future...

The variation of Paralympic sports to show that the gesture, despite an handicap, can also be magnificent.

I let you discover my work with these few examples and remain at your disposal if my idea arouses your interest.

CEDRIC UEBERSAX
Photographer & CGI Artist

Professional photographer and retoucher in the advertising industry for over 20 years, Cedric Uebersax works for multiple national and international actors.

His knowledge and perfect mastery of digital photography, from creation to shooting, from retouching to 3D tools, bring a global thinking in the service of creation. The images produced have a technicality suited to the conceptual idea.

His interest for digital technology innovations improves permanently his look upon his client's ideas, so as to providing them contemporary images.

Museum Of Olympic Art

If you have any questions, don't hesitate.

You can find the whole series on my site : www.cedric-u.com

I can move around the Paris region and/or work from home with the best tools and communicate quickly, thanks to optics fiber...
